Statement of Organization

Upon arrival with Paul Storrs
of W.H.A., the waste pit area
was inspected. One of the lower
chemical pits had been pumped
down to the thick effluent containing
material. Mr. Garrison advised
of information that 4 truck
loads of liquid had been
pumped down the hole and that
4 more would be filled tomorrow.
Will revisit site 5/27 w/Hayes.

MEMORANDUM

Date: 3/27/75

To: Galaxy File

From: R. Kenner

Subject: Discussion with Paul Mayz

This writer talked to Mr. Mayz about the corrected work currently underway at the Mt. Sam and Granite stone sites. It was indicated that he and Ted Hogan had difficulties in determining the final nature of the work. Two primary concerns were discussed:

1. The "ponds" to be emptied - two ponds were already empty, but some confusion remained regarding the third pond. It was confirmed that this was Galaxy's "bottom" pond which contained mostly sludge which would be taken care of as per two lines. 000071

2. Draining of "bridges" in ponds - It was confirmed

that Scammon of Civil Co Health ^{ORIGIN} ~~Health~~ advised
out open burning was definitely ruled out
just covering over the accumulated sludge in its
present state. Final decision was to excavate
a separate sludge storage area to be com-
pletely lined with clay (12" min.) on the
site. The material could not be dumped or
placed in tanks for hauling was out. Similar
manufacturing problems ruled out conventional truck
transport.

These items were all also with Paul
Mraz. Final ok was not given until this
writer talked to Ted Hagan about the project.
Hagan was to give final word to Mraz.

FIELD INVESTIGATION REPORT

Facility or area investigated:
I-Sand & Gravelite
Chesapeake, MD

Permit(s) contacted (include state):

MD: Sammons

Officer reports (name & title):

Statement of findings:
 Upon investigation found that first
 dry mixing pit has been filled
 and covered. Coal storage pit
 has not been cleaned and a new
 mixing pit is awaiting issuance
 of permit by Dept. of Environment.
 There are no catch basins or other
 structures to be wiped and
 I am talking with Mr. Sammons
 who advised that the mixing pit
 is being lined locally but that
 he had no plans to do this with
 the dry mixing pit.

One copy of this form is needed for each. If continued
